

# TEIJO 2005

Highly alkaline cleaner for heated component cleaning machines.

## Area of use:

- Suitable for cleaning parts made of iron, steel and stainless steel. Could also be used on various aluminium alloys.

## Properties:

- Resolves fatty vegetable contaminants, oil, soot, resins.
- Contains temporary corrosion protection
- Low foaming
- Quick separating

## Instruction of use:

Dilute with water to obtain a solution between 3 – 5%.

1 liter *TEIJO 2005* diluted with 20 parts water gives 5%.  
1 liter *TEIJO 2005* diluted with 33 parts water gives 3%.

Adjust the thermostat so that the solution maintains a temperature of 55-80 °C

To check when the dosing or change of the solution is necessary, a titration should be carried out on a regular basis.

For further information, see Material Safety Data Sheet

## Technical data

Appearance: Yellowish liquid

Smell: Weak

pH conc: 13,5

Density: 1,120 kg/m<sup>3</sup>

Solubility: Water soluble

Storage: Protect from freezing

Packaging 25 liter

Art.nr. TEIJO 2005
